INTERMOTIVE

**VEHICLE
CONTROLS**

ONE BOX . MANY SOLUTIONS.

Pre Trip Module

Activates all lights in a cycle so only one person needed for the inspection.

Eco-Star

Automatically turns off and on the engine while in Park to reduce and save fuel consumption

Idle Lock

Idle the vehicle with the security of being able to take the key out of the ignition.

AFIS III

Field adjustable high idle system that idles at three adjustable speeds.

Hawkeye Reverse Assistance System

Hawkeye provides audible and visual warning of objects behind your vehicle.

Intelligent Lift interlock

Automatic lift interlock system prohibits lift operation unless the vehicle is secured.

Gateway Lift InterLock with Fast Idle

Interlock keeps the vehicle from moving while lift is in operation, and it monitors the engine RPM to maintain power in all load conditions.

Speed Sentinel

Limits the maximum speed a vehicle can reach, saving gas and improving safety.

FlexTech

Complete vehicle electrical load control system, customizable to your needs.
