

PRE-TRIP MODULE

OVERVIEW

- Pre-Trip Module automatically turns on and off all the lights on the bus, including the brake and reverse lights, in a sequence
- This allows one inspector to complete a pre-trip inspection quickly by themselves

**PLUG AND PLAY
EASY TO INSTALL**

WHY PRE-TRIP

RELIABLE

Know if all the lights are working quickly and easily.

EFFICIENT

Exterior lights are activated in a pre-determined sequence, so the inspector can walk around the vehicle and inspect everything. The sequence is repeated until it is turned off.

AUTOMATE THE PRE-TRIP WITH

TRANSIT-CHECK

FORGET PAPER INSPECTIONS GET USEFUL DATA

While using InterMotive's Pre-Trip Module, continue to automate the process with Transit-Check, a new App and Web data system that takes the driver step-by-step through the Federally mandated vehicle inspection process. Get rid of paper and save cost, while improving the quality of inspections. Checks on the old paper forms will be turned into useful inspection data, that are used to automate maintenance and track vehicle and driver performance.

TRANSIT-CHECK ALSO

- Insures there is a completed inspection
- Generates maintenance failures with photos
- Monitors vehicle fuel use
- Checks for engine problems
- Can be customized to desired inspection inputs
